City of Pittsburgh Neighborhood Profiles

American Community Survey Five-Year Estimates

2005-2009 Data

About the University Center for Social and Urban Research (UCSUR)

The University Center for Social and Urban Research (UCSUR) was established in 1972 to serve as a resource for researchers and educators interested in the basic and applied social and behavioral sciences. As a hub for interdisciplinary research and collaboration, UCSUR promotes a research agenda focused on the social, economic and health issues most relevant to our society. UCSUR maintains a permanent research infrastructure available to faculty and the community with the capacity to: (1) conduct all types of survey research, including complex web surveys; (2) carry out regional econometric modeling; (3) analyze qualitative data using state-of-the-art computer methods, including web-based studies; (4) obtain, format, and analyze spatial data; (5) acquire, manage, and analyze large secondary and administrative data sets including Census data; and (6) design and carry out descriptive, evaluation, and intervention studies. UCSUR plays a critical role in the development of new research projects through consultation with faculty investigators.

The long-term goals of UCSUR fall into three broad domains: (1) provide state-of-the-art research and support services for investigators interested in interdisciplinary research in the behavioral, social, and clinical sciences; (2) develop nationally recognized research programs within the Center in a few selected areas; and (3) support the teaching mission of the University through graduate student, post-doctoral, and junior faculty mentoring, teaching courses on research methods in the social sciences, and providing research internships to undergraduate and graduate students. Achieving these goals requires that we continually upgrade and improve the research infrastructure of the Center, and that we recruit, develop, and maintain a core staff of investigators capable of being leaders in their fields.

About the Program in Urban and Regional Analysis

UCSUR's program in Urban and Regional Analysis focuses on economic change in the Pittsburgh region. UCSUR is a research affiliate of the Pennsylvania State Data Center (PaSDC) and maintains the Pittsburgh REMI model, an economic impact model for conducting economic impact analysis and economic and demographic forecasting for the greater Southwestern Pennsylvania Region. This report is part of the program's decades-long work to studying patterns of change in Pittsburgh neighborhoods.

UCSUR's Urban and Regional Analysis program also maintains the Pittsburgh Neighborhood and Community Information System (PNCIS), a property information system that collects integrated information on community conditions and provides it to local stakeholders. The PNCIS is a partnership of UCSUR, the Pittsburgh Partnership for Neighborhood Development (PPND), the City of Pittsburgh, and other stakeholders. UCSUR operates PNCIS in agreement with the City of Pittsburgh and PPND.

Neighborhood/Area Index

Overview

This research report compiles data from the U.S. Census Bureau's American Community Survey (ACS) for City of Pittsburgh neighborhoods. The ACS is a new source of information for analysis of small geographic areas. These data reflect survey responses collected over a five year period between 2005 and 2009 and are the first data released by the ACS program at the census tract and block group level of geography. Previous releases of ACS data have been limited to places with populations of 20,000 or more, including states, regions, counties and large municipalities. With the release of the five-year ACS, it is now possible to compile information about neighborhood conditions in the City of Pittsburgh.

The City of Pittsburgh defines 90 neighborhoods, each of which is a collection of one or more census tracts. The index of specific census tracts to neighborhoods is included in the appendix to this report. Also included is a set of combined neighborhoods, which have been defined solely for the purpose of this report as collections of other city neighborhoods. For example, Upper Lawrenceville, Lower Lawrenceville and Central Lawrenceville are combined into a single profile for "Lawrenceville."

This report will be one in a series UCSUR is producing to cover both ACS data releases and the 2010 decennial census. The ACS is a relatively new program which replaces what was known as the "long form" of the decennial census. The majority of data collected by the decennial census in recent decades came from a longer set of questions asked of one in six households in the nation. This "long form" questionnaire was eliminated the 2010 decennial census. Users should note the summary explanation of the ACS described in the next section.

This report follows similar reports of neighborhood conditions compiled by UCSUR. Past neighborhood data compendiums are available on the center's web page (www.ucsur.pitt.edu) and include sets of neighborhood reports from 1974, 1977, and 2000. UCSUR produced "The Social Geography of Allegheny County" for 1990 Census data which is available in print form upon request. Past projects focused on neighborhood level data for the city of Pittsburgh include the Pittsburgh Atlas Project from the 1970s, the Pittsburgh Neighborhood Information System (NIS) generated in the 1980s, which compiled data for all city neighborhoods back to 1930. Today, the center's focus for neighborhood level data is also encompassed in the Pittsburgh Neighborhood and Community Information (PNCIS), which includes an interactive GIS system of address-level data for the City of Pittsburgh and other communities in Allegheny County.

Summary of Demographic Characteristics: Pittsburgh MSA, Allegheny County, City of Pittsburgh and City of Pittsburgh Neighborhoods

	Pittsburgh MSA	Allegheny County	City of Pittsburgh	5 Highest Neighborhoods		5 Lowest Neighborhoods	
Percentage of population Black-alone	7.9	12.6	25.2	Homewood West	100	Bon Air	0.0
				Bedford Dwellings	97.6	Hays	0.0
				Middle Hill	96.7	North Shore	0.0
				Homewood North	95.9	Ridgemont	0.0
				East Hills	89.9	South Shore	0.0
Percentage of households comprised of married-couple families	48.3	43.6	29.3	New Homestead	87.8	Chateau	0.0
				Swisshelm Park	64.5	West End	0.0
				South Shore	55.6	Bedford Dwellings	1.9
				Point Breeze	54.7	Crawford-Roberts	3.4
				Summer Hill	54.0	Northview Heights	4.9
Percentage of total population in group quarters	3.0	3.2	7.4	Bluff	92.8	61 neighborhoods	0.0
				North Oakland	44.0		
				West Oakland	41.1		
				Terrace Village	36.6		
				Glen Hazel	30.3		
Percentage of population under age 18	20.7	20.4	17.2	Northview Heights	51.8	South Shore	0.0
				Saint Clair	45.1	North Shore	0.0
				California Kirkbride	45.0	Allegheny West	0.0
				Arlington Heights	40.6	Bluff	1.1
				Fairywood	36.0	North Oakland	2.7
Percentage of population age 65 or over	18.1	17.9	14.9	Glen Hazel	37.9	California Kirkbride	0.0
				Chartiers City	34.4	Chateau	0.0
				Homewood West	32.5	South Shore	0.0
				Homewood South	30.5	Bluff	0.7
				West End	28.4	Arlington Heights	6.1
Percentage of students enrolled in public schools – grades K through 8	69.0	66.4	64.7	7 neighborhoods: Spring Garden, Glen Hazel, Bon Air Fairywood, Ridgemont Polish Hill, Strip District	100	Hays	0.0
						Bluff	0.0
						West End	0.0
						Regent Square	14.3
						Summer Hill	19.4
Percentage of students enrolled in public schools – grades 9 through 12	91.0	89.0	83.7	North Oakland	0.0	36 neighborhoods	0.0
				Banksville	26.4		
				Homewood West	32.0		
				Bloomfield	36.8		
				Shadyside	42.0		

Summary of Economic Characteristics: Pittsburgh MSA, Allegheny County, City of Pittsburgh and City of Pittsburgh Neighborhoods

	Pittsburgh MSA	Allegheny County	City of Pittsburgh	Highest Neighborhoods		5 Lowest Neighborhoods	
Percent of people below poverty level in the past 12 months	11.8	12.6	21.7	Homewood South	31.9	West End	0.0
				Lincoln-L.-B.	30.4	North Shore	0.0
				Hays	29.5	South Shore	0.0
				Golden Triangle	28.8	Regent Square	1.1
				Knoxville	28.6	Strip District	2.1
Percentage of occupied housing units renter-occupied	28.5	32.9	47.9	Northview Heights	100	Windgap	8.9
				North Shore	100	New Homestead	9.6
				South Shore	100	Chartiers City	9.8
				Chateau	100	Lincoln Place	11.7
				Terrace Village	96.9	Overbrook	11.8
Percentage of population age 25 and over with bachelors degree or higher	27.7	33.5	33.2	Squirrel Hill North	81.9	Northview Heights	0.0
				Shadyside	76.3	Saint Clair	4.6
				Regent Square	71.2	East Carnegie	5.4
				Point Breeze	69.9	Mount Oliver	5.9
				Squirrel Hill South	69.1	Esplen	6.3
Percentage of population age 25 and over with less than a high school degree	10.0	8.8	12.1	Hays	56.7	South Shore	0.0
				Glen Hazel	41.0	Squirrel Hill North	1.8
				Esplen	34.5	Summer Hill	3.8
				Crawford-Roberts	27.6	Regent Square	4.0
				Homewood West	26.8	Shadyside	4.2
Percentage of workers age 16 and over commuting to work by public transit	5.8	10.1	19.7	Arlington Heights	88.9	Ridgemont	0.0
				Northview Heights	77.4	East Carnegie	0.0
				Saint Clair	55.0	Hays	0.0
				Middle Hill	48.3	North Shore	0.0
				Terrace Village	45.2	New Homestead	1.9
Percentage of population age 1 and over who resided in a different state 1 year ago	1.6	1.9	3.7	North Shore	31.0		
				Squirrel Hill North	13.6		
				North Oakland	13.6	32 neighborhoods	0.0
				Regent Square	12.3		
				Shadyside	10.7		

Using the American Community Survey

This American Community Survey (ACS) uses a series of monthly samples to produce annually updated data for the same small areas including census tracts and block groups. For neighborhood data, the major difference between the "long form" census data and the ACS is that the ACS has a smaller sample size than the long form. To obtain reliable estimates for small areas, multiple years of ACS data must be combined to produce a single indicator. For geographic areas with populations over 65,000 the ACS is reporting data for single years. For geographic areas with populations between 20,000 and 65,000 the ACS aggregates survey responses for three-year periods. For small geographic areas, including census tracts, the ACS reports data aggregated from five years of survey responses. City of Pittsburgh neighborhoods are currently defined by either a single census tract, or a collection of census tracts. The five year ACS data is the only data set available from the program that can be used to compile information at neighborhood geographies. The ACS program will release new data annually, but for the smallest geographies, the data will reflect a new five year time frame for each release.

Users need to know that most data reported at small area geographies in the ACS have significant margins of error. Data for individual census tracts and the associated margins of error for each datapoint referenced in these tables are available online via the Census Bureau's Factfinder online website (http://factfinder.census.gov.) In general, sample error is larger for smaller areas, or in particular, for smaller subgroups of populations within an area. The nature of these errors should also be taken into account when comparing neighborhoods with each other or comparing data compiled the ACS with previous decennial censuses.

It is recommended that the data released by the ACS program should be used to understand the *characteristics* of specific geographic areas, and the data generally should not be used as a reference for the specific *counts* of individuals, households or housing units.   There are multiple reasons for this. Because the population controls used in the ACS methodology for the five-year 2009 release uses data dating back to the 2000 decennial census, the usefulness of the ACS for measuring absolute changes in population levels between reporting periods is limited. Other census programs are recommended for capturing total population counts, including the decennial census and the Census Bureau's Population Estimates Program (PEP), which provides annual population data for all counties, and county equivalents, and most incorporated places in the United States.

The profiles in this report use ACS data collected by survey responses between January, 2005 and December, 2009. The next release of tract level data from the ACS program will be for survey responses collected between 2006 and 2010, with new releases of five year ACS estimates data occurring each year. The next five-year ACS release in 2011 is anticipated to use population controls based on data from the 2010 decennial census, and thus may be qualitatively different from this data release.

When comparing ACS data to past data compiled from any decennial census, users should note other differences between the programs. The decennial census is data collected at a point in time, with a reference date for recent censuses of April 1st of the decennial year. The ACS data is collected continuously throughout the year. As such it does not reflect a single point in time as does the decennial census. Certain data that can be impacted by seasonal trends throughout the year may see distinct differences in results between the two methodologies.

Understanding the methodology of the ACS program will allow users to best use this new source of data for neighborhood analysis. One distinct advantage of the ACS program is that it will be providing annual updates for many types of data that previously were only available with the decennial census. Nonetheless, the differing methodology between the ACS and decennial census limits some of the direct comparisons of specific information.

Neighborhood Profiles

The 2005-2009 American Community Survey (ACS) data has been compiled to produce neighborhood profiles for the City of Pittsburgh.   These profiles reflect the characteristics of the residents of each identified neighborhood. The neighborhood definitions are those currently used by the City of Pittsburgh, and have been defined using tract boundaries defined for the 2000 census. For historical comparisons, users should note that City of Pittsburgh neighborhood definitions have changed over the decades. Data released by the U.S. Census Bureau from the 2010 decennial census uses updated census tract boundaries, which will impact certain neighborhood boundaries.

Individual profiles are provided for each of 90 City of Pittsburgh neighborhoods, and for the City of Pittsburgh, Allegheny County and the seven-county Pittsburgh Metropolitan Statistical Area (MSA). For each area, one page of demographic profiles are provided, and one page of economic profiles.

Combined Neighborhood Profiles

The following profiles are for a set of combined neighborhoods defined solely for the purposes of this report. These combined neighborhoods are defined solely as collections of City of Pittsburgh neighborhoods which border one another and share historical connections or share similar names. These combined neighborhood definitions are not reflective of any official neighborhood definitions used by the City of Pittsburgh or others. The following table reflects the definitions used in the following profiles.

Components of Combined-Neighborhoods

Combined Neighborhood	Included Neighborhoods
Hill District	Bedford Dwellings , Crawford-Roberts, Middle Hill, Terrace Village, Upper Hill
Homewood	Homewood North, Homewood South, Homewood West
Lawrenceville	Upper Lawrenceville, Lower Lawrenceville, Central Lawrenceville
Oakland	Central Oakland, North Oakland, South Oakland, West Oakland
Squirrel Hill	Squirrel Hill North, Squirrel Hill South

$150,000 to $199,999	769	7.0%
$200,000 or more	1,350	12.2%

Poverty
RATIO OF INCOME TO POVERTY LEVEL IN THE PAST 12 MONTHS

Universe: Population for whom poverty status is determined

Total	23,701	
Under .50	1,577	6.7%
.50 to .99	941	4.0%
1.00 to 1.24	574	2.4%
1.25 to 1.49	655	2.8%
1.50 to 1.84	1,283	5.4%
1.85 to 1.99	620	2.6%
2.00 and over	18,051	76.2%
Under 1.0	2,518	10.6%

Tenure
Universe: Occupied housing units

Total	11,024	
Owner Occupied	5,559	50.4%
Renter Occupied	5,465	49.6%

Educational Attainment
Universe: Population 25 Years and Over

Total	17,344	
No schooling completed	39	0.2%
Less than 9th grade	174	1.0%
9th grade	102	0.6%
10th grade	44	0.3%
11th grade	139	.8%
12th grade, no diploma	145	0.8%
High school graduate, or GED	1,845	10.6%
Some college, less than 1 year	331	1.9%
1 or more years college, no degree	1,070	6.2%
Associates degree	668	3.9%
Bachelors degree	4,702	27.1%
Masters degree	4,073	23.5%
Professional school degree	2,031	11.7%
Doctorate degree	1,981	11.4%
Bachelors degree or higher	12,787	73.7%
Less than High school	643	3.7%

Commuting
MEANS OF TRANSPORTATION TO WORK

Universe: Workers 16 years and over

Total	13,741	
Drove alone	7,038	51.2%
Carpooled	941	6.8%
Public transportation (excl taxi)	2,430	17.7%
Bicycle/Walked	2,374	17.3%
Taxicab, motorcycle, other	46	0.3%
Worked at home	912	6.6%

Migration
GEOGRAPHICAL MOBILITY IN THE PAST YEAR

Universe: Population 1 year and over in the United States

|		
Total	27,847	
Same house 1 year ago	20,662	74.2%
Moved within same county	2,817	10.1%
Moved from different county within same state	609	2.2%
Moved from different state	2,840	10.2%
Moved from abroad	919	3.3%
